

Health & Safety Policy Statement

Dalen Limited is committed at the highest level to assessing, controlling and improving Health & Safety considerations which result from the activities products and services within our industry.

- We strive to meet all regulatory and legislative obligations.
- The company is committed to continually improving our Safety Management, and performance through a series of hazard identification in order to improve the working environment and reduce the risk of accidents, including aspects of ill health.
- Training instructions and supervision where appropriate will be provided to ensure safe systems of work are operated and developed throughout the business.
- Safety awareness with appropriate Tool Box Talks will be promoted to all employees and applicable sub contractors. This is seen as being a key element to success in achieving improvements.
- The Written Scheme illustrates we have a range of Processes and Procedures in place and Hazard Identification Risk Assessments and other mechanisms to ensure on-going continual improvement of our H&S activities.
- The Policy will be reviewed at the annual review and is made available to all personnel.
