About Synergy Collaboration Range...

Ergonomic Design

Worktop neck increases the users distance from screen, putting less strain on eyes and neck muscles.

Flexible design

New styling and a smaller footprint. Options to add sockets and ports into the leg. Plus more colour choice.

Large Range

Available for groups of 3 to 20 people. Great for small huddle spaces to seminars and board meetings.

Connectivity Options

Customisable connectivity in the mast and leg and includes optional data cabling in the worktop. Housings available to integrate additional technology such as wireless connection points (e.g. AirMedia™, ClickShare, AMX Hydraport and wePresent).

Selection of Models

The four standard worktop shapes includes Quad, Plectrum, Reverse Plectrum and Teardrop. The range is extended to cater for up to 20 seats.

Mobility

Synergy can be supplied as fixed or mobile, with a re-locatable folding option for multi-use rooms and easy storage.

Synergy In Business

A positive first impression with customers. An area to share visual information with clients and co-workers that promotes interaction. Technology enabled boardroom environments where colleagues can discuss ideas and collaborate.

Quad 6 (Birds eye view)

Quad 6 (Front view)

Synergy In Training

The Synergy Plectrum is ergonomically designed to promote outward presentation, collaboration and engagement with the screen as a resource. Agile spaces that can be used for both training and group work.

Inclusive learning process that encourages all to contribute ideas. Space for new training methods that increase positive attitude towards work.

Plectrum (Birds eye view)

Plectrum (Front view)

Corporate Training

Synergy workstations are used for group collaboration during training sessions for small group analysis. Seamlessly technology can be integrated to allow you to synchronise and display group work locally or amongst the cluster.

Available in a large range of sizes and shapes to suit the size of room and the purpose intended for, whether that be displayed or audience focused.

Synergy helps play to the social strengths of people and relationships where teamwork and talking to solve complex problems are key. Replacing outdated training techniques, Synergy delivers benefits to trainees and instructors:

- Trainees enjoy learning more and achieve better outcomes.
- Trainees are better equipped with transferable skills for employment or research or continuing education.
- Instructors have an better environment to work with.

Modern corporate-style facilities deliver excellence in learning and better prepare employees for life beyond the classroom and help recruit the best candidates for employment.

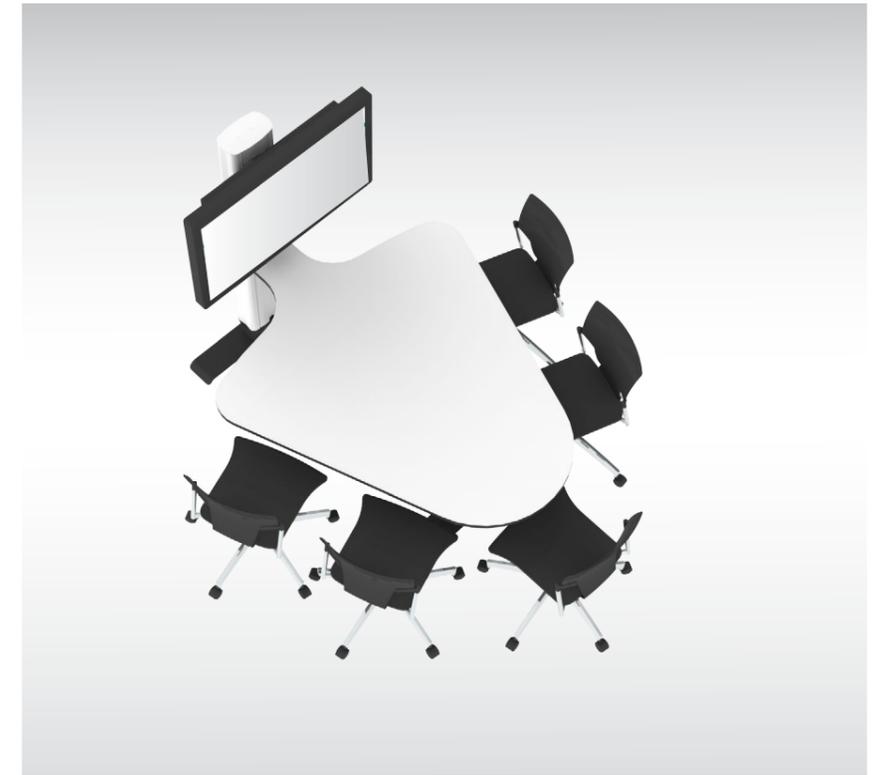

The business community are embracing the collaborative approach as part of their agile working methods. The primary focus being around improving the productivity of meetings.

Flexible Meeting Spaces

The Synergy Plectrum reverse is set up to allow engagement in vide conferencing where the screen and peripheral vision of a mast mounted camera are the main emphasis.

If you wish to add this functionality to Synergy, the Data Interface Plate can be configured for the sharing device and wired up through the mast.

Using Dalen Design Concepts

Dalen Design Concepts provide you with Room Planning, Consultancy and Design all from a UK based Manufacture and Fitting Services company. This end-to-end service ensures the correct first time, fit for purpose installation.

Teardrop (Birds eye view)

Teardrop (Front view)

Gather Around

Today's meetings are not limited or restricted to physical room size. Customers and colleagues can 'join-in' with briefings, presentations or events. This can be a game changer for establishing a deep rapport in customer management.

Huddle (Birds eye view)

Agile Workspace Solutions

Our Folding SYNERGY tables allow agile workspaces and meeting rooms to remain flexible and remove the intrusion and expense that is usually incurred from AV integration.

Because we have added features such as a rotating screen mount to facilitate fitting through standard doorways, high-strength swivel castors for added mobility and a simple manual mechanism for quick assembly, the SYNERGY Folding table can be stored away. This allows rooms to be cleared when extra space is needed.

Folding (Birds eye view)

Accessories

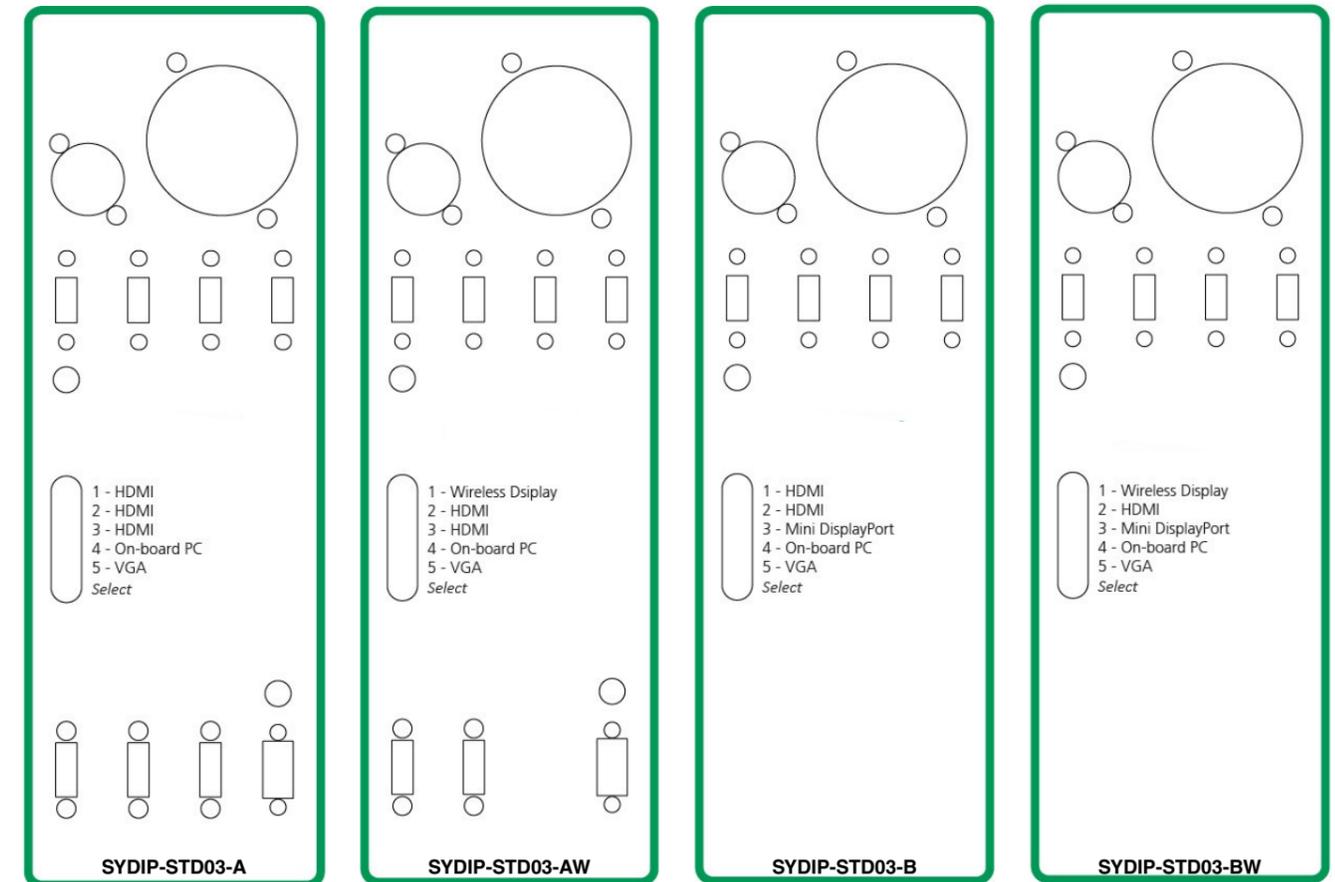

If you have additional requirements we can supply retractable cable tidies, keyboard shelves, control panel housings, additional power options and connectivity such as USE, HDMI, DVI and VGA.

Data Interface Plates

If you have specific connectivity requirements for your SYNERGY we offer a bespoke service to meet them. you may choose to mix and match connections such as **USB, HDMI, DisplayPort, Mini DisplayPort, DVI or even VGA**. The only limit is the space available to wire them in. See *example configurations below*.

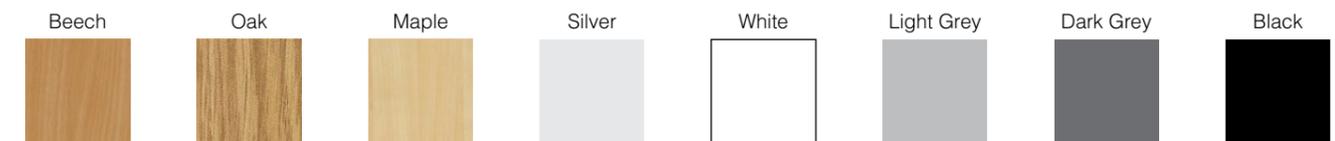

Additionally we can customise labels to match your corporate branding. If supplied with logos and preferred colours we can print your vinyl branding and custom labels in-house.

Colour options

Your Synergy table top the way you want it. The standard colour options are shown below however we are able to reproduce your desired corporate colours to the nearest PANTONE/RAL colour at an additional cost.

Table Tops

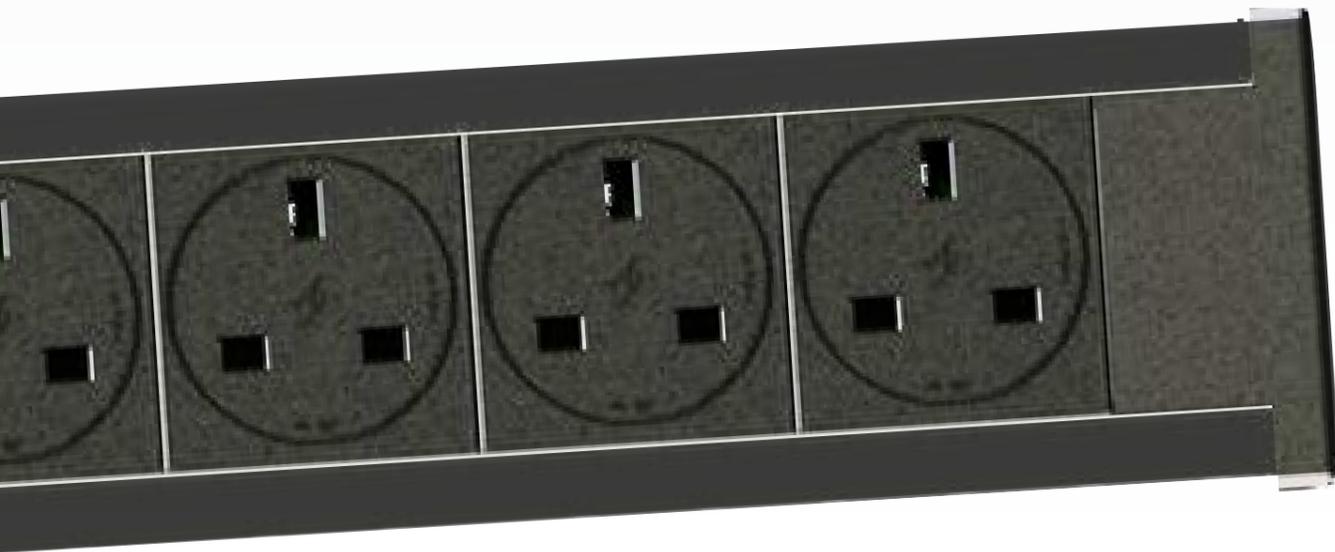

Body colours

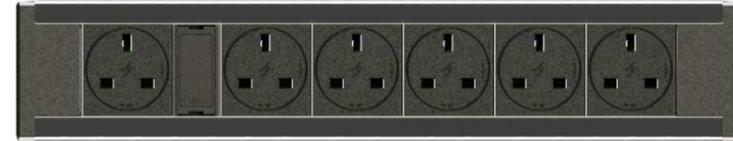

Power Points

We are able to supply a number of power point options to meet your requirements, these can be fitted into numerous spaces on the SYNERGY including the mast, legs and table top.

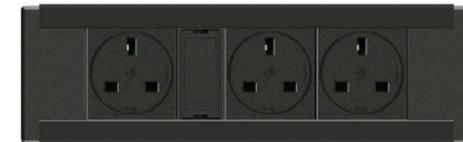

We are also able to include powered USB connections within the units.

Power Options

6 x Power sockets - Silver

3 x Power sockets

3 x Power sockets + 4 x USB Charging

2 x Power sockets

2 x Power sockets + 2 x USB Charging

1 x Power sockets + 2 x USB Charging
